Schedule

W LEGO® Challenge December 26

Want to design your own LEGO®creations? This camp will transport every engineer in to the playful world of LEGO®s! The challenge will be for the other players to construct the colorful creations you've designed.

Th POP! December 27

What are filled with air, always perfect spheres, and go POP? Bubbles! Discover how to make bubbles using everyday materials found in your kitchen, bedroom or yard! Plus, take home your own special bubble solution.

Danger Zone December 28

Do you live life on the dangerous side? Safety hats will be required as you begin this demolition project! This camp will have a "solid foundation" of fun you won't want to miss!

M Frozen Creations December 31

Have you ever painted... with ice? Or played with snow... inside? If you like frozen H₂O creations, but want to stay warm and toasty while you explore, then this is exactly what you've been looking for!

W Rocket Marvels January 2

How will gravity and aerodynamics play a role in the launch of your rocket? Blast off with science as you challenge yourself through hands-on rocket exploration!

Th Science of Sports January 3

Is a helium-filled football more aerodynamic than one filled with air, or just a flop? Find out through experimentation and play - in this investigative camp!

F Amazing Chemistry January 4

What is a glowing pickle? Come and make one for yourself! Get ready to put on your lab coat, grab the flasks and beakers, and head to the chemistry lab for a fantastic day of chemistry!

2012 Winter L.A.B.S. Camp Registration
